I.- ANTECEDENTES GENERALES DE LA PROPUESTA

NOMBRE DE LA PROPUESTA

5º Simposio Internacional de Kiwi.

UGAR DE REALIZACIÓN DE LA ACTIVIDAD

País: China.

Ciudad : Wuham.

TIPO O MODALIDAD DE FORMACIÓN

Evento Técnico (Simposio).

AREA DE LA ACTIVIDAD

Rubro: Fruticultura

Tema : Kiwi.

INSTITUCIÓN O ENTIDAD RESPONSABLE QUE DICTA U ORGANIZA LA ACTIVIDAD
DE FORMACIÓN A LA CUAL SE POSTULA

Nombre: Wuhan Institute of Botany (auspicio de la International Society for Horticultural Sciences).

Página Web: www.hast.org.cn/hast/hbkx/kiwi2002

Nombre: Felipe Maximiliano Matías Kulczewski Bustos.

RUT:

Dirección particular: Camino Los Niches Km. 4.5 – Curicó.

Fono: 75 – 322652.

Institución o empresa donde trabaja: Ingeniero Agrónomo Independiente.

Cargo actual y relación contractual :

Dirección comercial: Camino Los Niches Km. 4.5 – Curicó.

Fono: 75 – 322652.

Fax: 75 - 322652

E-mail: matiaskb@entelchile.net

Firma

F. Matías Kulczewski

ENTIDAD PATROCINANTE (en caso que corresponda)

Nombre Entidad Patrocinante: _____

RUT :

Dirección :

FECHA DE REALIZACIÓN

Inicio : 14 de Septiembre de 2002.

Término : 21 de Septiembre de 2002.

COSTO TOTAL DE LA PROPUESTA

\$2.427.842

FINANCIAMIENTO SOLICITADO

\$ 1.645.056

68 %

APORTE DE CONTRAPARTE

\$ 782.786

32 %

2. JUSTIFICACIÓN DE PARTICIPACIÓN EN LA PROPUESTA

La asistencia al 5º Simposio Internacional del Kiwi en China tiene numerosas justificaciones. A continuación se resumen las principales:

- Este Simposio se realizará y permitirá tomar contacto directo con la zona de origen de la especie *Actinidia deliciosa* (kiwi) y sus afines. Ello permitirá comprender mejor sus características y así tomar mejores decisiones en su manejo productivo y comercial.
- El Simposio de la ISHS (International Society for Horticultural Sciences) concita a investigadores y otros profesionales dedicados al kiwi en el mundo, quienes exponen sus últimas investigaciones en las diversas áreas del rubro. Esto permite la actualización de los conocimientos y establecer contactos con especialistas en áreas de interés del cultivo.
- Chile es el tercer productor mundial de kiwi y la investigación local es bastante reducida. Por lo tanto nuestra industria tiene muchas interrogantes técnicas que se suelen responder al menos parcialmente en simposios de este nivel. Entre éstas, algunos temas relevantes para la calidad del producto (polinización y cuaja efectiva de semillas, ablandamiento y conservación en almacenaje, etc) y el desarrollo de nuevas variedades y portainjertos, que permitan diversificar la oferta respecto a nuestra realidad nacional de productores univarietales.
- Como profesional, he sido uno de los líderes del desarrollo técnico de este cultivo en el país, asesor de muchos agricultores y empresas y profesor del cultivo en distintas universidades y cursos sobre el mismo. El perfeccionamiento profesional que se obtenga en este Simposio se traducirá en progresos hacia mayor competitividad de nuestra industria en variadas instancias.

3. OBJETIVOS DE LA PROPUESTA

3.1. GENERAL:

Aumentar los conocimientos que permitan mejorar la productividad y calidad de las plantaciones de kiwi en Chile dentro del marco de competitividad mundial.

3.2 ESPECÍFICOS:

- Mejorar la polinización, principal factor limitante de la calidad (calibre) del kiwi en nuestro país.
- Comprender mejor los factores que explican el ablandamiento prematuro del kiwi, para optar a mejorar su conservación y calidad de llegada a los mercados de destino.
- Conocer nuevas variedades que permitan ampliar la oferta de productos con valor comercial atractivo.
- Aumentar la productividad y calidad del kiwi mediante técnicas de poda, manejo de canopia, anillado, nutrición y riego mejoradas respecto a nuestras prácticas habituales en las plantaciones nacionales.
- Establecer contacto con investigadores, que faciliten el intercambio futuro de conocimientos y experiencias que permitan mejorar nuestra tecnología de producción del kiwi.

4. ANTECEDENTES DE LA INSTITUCIÓN QUE DICTA LA ACTIVIDAD DE FORMACIÓN (Adjuntar antecedentes adicionales en el Anexo N° 3)

La ISHS (International Society for Horticultural Sciences) es una organización que reúne a científicos y profesionales de todas las áreas de la Horticultura.

Los Simposios son publicados en la revista Acta Horticulturae.

Esta organización edita también la revista de divulgación científica: HortScience.

Por su parte, el organizador de este Simposio es el Instituto de Botánica de Wuhan, patrocinado por la Academia de Ciencias de China, bajo el auspicio de la ISHS en colaboración con la Sociedad China de Ciencias Hortícolas

5. PROGRAMA DE ACTIVIDADES DE LA PROPUESTA (Adjuntar antecedentes solicitados en el Anexo N° 4)

Domingo 15: Inscripción, Registros y bienvenida.

Lunes 16, Martes 17 y Jueves 19: Presentaciones orales y posters.

Miércoles 18: Gira a terreno.

Sábado 20: Ceremonia de clausura.

V. L.

5.1 CARTA O CERTIFICADO DE ACEPTACIÓN DEL POSTULANTE DE ACTIVIDAD DE FORMACIÓN (Adjuntar en Anexo N° 5)

RESULTADOS E IMPACTOS ESPERADOS.

espera adquirir conocimientos y contactos que contribuyan a mejorar la capacidad de diagnóstico y recomendaciones en el manejo del cultivo del kiwi, lo que permitirá mejorar su productividad y calidad.

espera descubrir variedades y/o portainjertos nuevos interesantes para nuestra industria.

aplicación de los conocimientos adquiridos se llevará a cabo a través de la asesoría técnica a agricultores y empresas (actualmente 15 clientes que reúnen 500 has de kiwi).

se darán charlas a impartir a la Corporación Pomanova y al Grupo de Transferencia Tecnológica a la que pertenece como integrante y Coordinador respectivamente, son medios de difusión que tendrán un impacto a través de la gestión de sus integrantes.

todo lo anterior contribuye a afianzar el prestigio profesional y la condición de líder o referente técnico del Postulante en la industria nacional del kiwi.

7.- ACTIVIDADES DE DIFUSIÓN

FECHA	TIPO DE ACTIVIDAD	OBJETIVO	LUGAR	Nº Y TIPO BENEFICIARIOS	INFORMACIÓN A ENTREGAR
16 de Octubre de 2002	Charla	Ilustración de realidad clima y visión de oportunidades de negocios	Curicó	12 empresarios frutícolas (GTT Frutales & Gestión 2000)	Diaporama y exposición oral de aportaciones.
30 de Octubre de 2002	Charla	Ilustración de realidades y transferencia de novedades tecnológicas.	Curicó	100 productores de la zona central, entre V y X región.	Ilustración (diaporama) de realidades de clima y resumen oral de aportaciones técnicas del Simposio.
31 de Octubre de 2002	Charla	Idem	Idem	Corporación Pomanova, 24 profesionales del rubro frutícola.	Presentación oral e Informe en CD.

8.- ITINERARIO PROGRAMA DE TRABAJO

FECHA (Día-mes-año)	ACTIVIDAD	OBJETIVO	LUGAR
15 Septiembre 2002	Inscripción y Bienvenida.	Inscripción y adquisición de materiales del Simposio.	Lakeview Garden Hotel, Wuhan – China.
16 y 17 Septiembre 2002	Presentación de trabajos orales y posters.	Presentación y Discusión de trabajos.	Lakeview Garden Hotel, Wuhan – China.
18 Septiembre 2002	Salida a terreno.	Recorrer lugar de origen del kiwi, plantaciones y turismo agronómico.	Provincia de Hubei – China.
19 Septiembre 2002	Presentación de trabajos orales y posters.	Presentación y Discusión de trabajos.	Lakeview Garden Hotel, Wuhan – China.
20 Septiembre 2002	Ceremonia de clausura.	Clausura del Simposio.	Lakeview Garden Hotel, Wuhan – China.

ANEXO 1
CURRICULUM VITAE DEL POSTULANTE

CURRICULUM VITAE

1.- IDENTIFICACIÓN:

Nombre : FELIPE MAXIMILIANO MATÍAS KULCZEWSKI BUSTOS.
Fecha de Nacimiento : Noviembre 18 de 1957.
Estado Civil : Casado.
Nacionalidad : Chileno.
Cédula de identidad :
Teléfono : 075 / 322652 (Oficina), 09 / 822 1281 (Celular).
E-mail : matiaskb@entelchile.net

2.- ESTUDIOS

2.1.- ESTUDIOS BÁSICOS Y MEDIOS:

- De 1962 a 1974 en el Colegio Inglés "MACKAY" - Viña del Mar, Chile

2.2.- ESTUDIOS UNIVERSITARIOS:

- De 1975 a 1981, Agronomía en la Universidad Católica de Valparaíso.
- Mejor egresado de la promoción 1981. Por esta razón, premio de la Sociedad Agronómica de Chile.
- Mejor titulado en 1983, premio de la Facultad de Agronomía, Universidad Católica de Valparaíso.
- Tesis: "Aspectos de Biología de Floración y Evolución de Propiedades Físicas y Químicas del Fruto de Kiwi (*Actinidia Chinensis* P), en dos localidades de la zona Centro-Sur de Chile.
- Título: Ingeniero Agrónomo, Universidad Católica de Valparaíso, Chile.

3.- ACTIVIDAD PROFESIONAL:

3.1.- ASESORÍA TÉCNICA NACIONAL:

- A partir de Julio de 1981, asesor de huertos de Kiwi, Uva de mesa y Frutales de Carozo, en la Cooperativa Agrícola y Frutícola de Curicó Ltda. (COOPEFRUT).

- Desde 1986, jefe técnico del área Uva de Mesa, Frutales de Carozo y Kiwi del departamento agronómico de Coopefrut.

- Desde Junio de 1988, se retira de Coopefrut para el ejercicio independiente de la profesión. Actualmente se desenvuelve en asesoría técnica de Kiwi, Manzano, Ciruelo, Cerezo, Peral Europeo, Peral Asiático y Duraznero en diferentes Empresas Agrícolas tales como:

EMPRESA

AGRÍCOLA & FORESTAL EL ESCUDO
AGRÍCOLA LA TORRE S. A.
AGRÍCOLA LOS ALPES
AGRÍCOLA SAN CLEMENTE
AGRÍCOLA SAN ISMAEL
AGROPECUARIA WAPRI LTDA.
ARROCERA TUCAPEL
AS. AGRIC. E INVS. EDWARDS S.A.
ASIMFRUT
COMERCIAL ALDUNA
EL MANZANO S.A.
EXPORTADORA CHIQUITA
FRUTÍCOLA RAMIRANA S.A.
GTT FRUTALES & GESTION 2000 (12 EMPRESAS)
L. HUGHES & CÍA.
TRINIDAD EXPORTS

3.2.- ASESORÍA TÉCNICA INTERNACIONAL:

- Asesor técnico de Kiwis de la Compañía SANDUPAY en Paysandú - Uruguay, desde 1988 hasta 1991.

- Asesoría técnica en pomáceas y frutales de carozo en Cía. Manuel Ruano en Mendoza, Argentina, en 1991-1992.

- Asesoría técnica a Cía. Corporación de los Andes, Mendoza – Argentina, desde 1994 a 1999.

3.3.- DOCENCIA:

a) Coordinador y profesor de curso "Manejo de Parronales", Facultad de Agronomía Universidad Católica de Valparaíso, desde 1983 hasta 1988.

b) Profesor del tema "Ciruelo", en el curso "Frutales de Hoja Caduca", Facultad de Agronomía Universidad Católica de Valparaíso, desde 1983 hasta 1997.

c) Profesor del tema "Kiwi", en el curso "Frutales de Hoja Caduca", Facultad de Agronomía Universidad Católica de Valparaíso, desde 1981 hasta 1989.

d) Profesor del tema "Ciruelo" en el curso "Frutales de Hoja Caduca", Facultad de Agronomía Pontificia Universidad Católica de Chile (Santiago), durante el 2º semestre de 1987.

e) Profesor del tema "Kiwi" en el curso "Frutales de Hoja Caduca", Facultad de Agronomía Pontificia Universidad Católica de Chile (Santiago), 2º semestre de 1986.

f) Profesor del tema "Kiwi" en el curso "Frutales de Hoja Caduca", Universidad de Talca, durante 1994 y 1995.

g) Profesor del tema "Manzanos" en la Facultad de Agronomía de la Universidad Católica de Valparaíso en 1997.

3.4.- EXPOSITOR DE SEMINARIOS:

- "Producción, Manejo e Industrialización del Kiwi", Fundación Chile, 1985.

- "Aspectos Relevantes del Negocio Frutícola". Fundación Chile, 1987.

- "Producción de Kiwi", Facultad de Agronomía, Pontificia Universidad Católica de Chile (Santiago), 1988

- "Primer Seminario Nacional sobre el Cultivo de Kiwi", organizado por Tecnoplant S.A. y auspiciado por INTA, en Buenos aires, Argentina 12 y 13 de Mayo de 1988.

- Seminario Internacional: "Sistemas de Producción de Nuevas Variedades de Manzanos", Corporación Pomanova, Curicó, Septiembre de 1995.

- Análisis de la Industria Chilena de la Manzana frente al Siglo XXI", Corporación Pomanova, Curicó, Junio de 1999.

- Seminario Internacional de Cerezos: Actualización Comercial, Variedades, Portainjertos y Sistemas de Conducción, Corporación Pomanova, Curicó, Agosto de 2001.

5.- VIAJES AL EXTRANJERO:

septiembre de 1982	: Visita Frutícola a California.
septiembre de 1984	: Visita Frutícola a Sudáfrica.
agosto de 1985	: Visita Frutícola a Nueva Zelandia y Australia.
mayo de 1986	: Visita Frutícola a California, U.S.A.
mayo de 1987	: Visita Frutícola a Nueva Zelandia y Australia
septiembre de 1988	: Visita Frutícola a California, U.S.A.
septiembre de 1990	: Gira Frutícola a Europa.
septiembre de 1991	: Visita Frutícola a California, Oregón y Washington.
febrero de 1994	: Visita Frutícola a Nueva Zelandia.
junio de 1998	: Visita Frutícola a Alemania, BASF.
agosto de 1998	: Visita a la Costa Oeste de Estados Unidos y Canadá
febrero de 2000	: Visita a Nueva Zelanda y Australia.
julio de 2001	: Simposio Internacional de Cerezos y Gira a British Columbia (Canadá), Washington y Oregon (USA).
Mayo de 2002	: Visita Frutícola a California (USA).

3.6.- ASISTENCIA A CURSOS Y SEMINARIOS:

- Manejo de Frutales en Estados Unidos, Fundación Chile, 1980.
- El Cultivo del Peral, Facultad de Agronomía, Pontificia Universidad Católica de Chile, 1981.
- Uso y Manejo de Pesticidas Agrícolas. Facultad de Ciencias Agrarias y Veterinarias, Universidad de Chile, 1981.
- El Cultivo del Ciruelo, Fundación Chile, 1983.
- Uva de Mesa de Exportación: Problemas de Producción y Calidad, facultad de Agronomía Pontificia Universidad Católica de Chile, 1984.

roducción, Industrialización y Mercados para Berries, Fundación Chile, 1988.

Curso Internacional de manejo de Agua en Frutales. Universidad de Concepción, 1990.

Cultivo y Perspectivas del Cerezo y Guindo, Universidad de Talca, 1991.

Curso Internacional de Manzanas, INTA Alto Valle, Río Negro, Argentina, 1992.

Innovaciones Tecnológicas para el Cultivo y Manejo del Kiwi, Universidad de Chile, 1995.

Seminario Internacional "Cultivo del Cerezo", Universidad de Talca, 1995.

Seminario Internacional "Producción de Manzanos para el Siglo XXI" Corporación Pomanova, 1997.

Seminario "Análisis de la Industria Chilena de la Manzana frente al Siglo XXI", Corporación Pomanova, 1999.

43º Conferencia Anual de la International Dwarf Fruit Tree Association (IDFTA), Napier, Nueva Zelanda, 2000.

4º Simposio Internacional de Cerezos, Washington y Oregon, USA, Junio de 2001.

Seminario Internacional de Cerezos: Actualización Comercial, Variedades, Portainjertos y Sistemas de Conducción, Corporación Pomanova, Curicó, Agosto de 2001.

ROS:

Coordinación y participación activa en grupo de Intercambio Técnico Nacional (Ingenieros Agrónomos): "Corporación Pomanova" (manzanos, perales, kiwis), Presidente de POMANOVA en 1996.

Representación y participación activa en Chile y Argentina con Sr. John Wilton, Director Internacional (Nueva Zelanda), especialista en manzanos y fruticultura.

- Participación activa con Dr. Tienie Du Preez, Consultor Internacional (Sudafrica), especialista en suelos, riego y nutrición de árboles frutales.

- Representante y participación activa con Sr. Derek Snowball, Consultor Internacional (Nueva Zelandia), especialista en post-cosecha (frigorífico, embalaje - manejo de post-cosecha) de kiwis y otros frutos.

- Representante y participación activa con Sr. Michel Ramonguilhem, consultor en desarrollo del sistema Solaxe, Francia.

Invitation

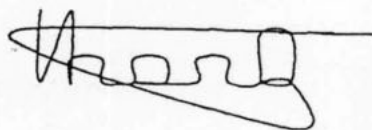

Dear Colleagues:

You are cordially invited to participate in the 5th International Symposium on Kiwifruit, to be held in the Lakeview Garden Hotel, Wuhan city, Hubei province, P.R. China, September 15-20, 2002. The symposium is organized by Wuhan Institute of Botany and sponsored by the Chinese Academy of Sciences, under auspices of the International Society for Horticultural Sciences.

The symposium will continue to review recent advances in kiwifruit research, extension and production in past four years after the last symposium in Chile. It provides an opportunity for the presentations of all aspects of genetics/breeding, germplasm/taxonomy & systematics, molecular biology/biochemistry, propagation/tissue culture & biotechnology, production/economics & marketing, orchard management, post harvest/physiology, etc. The first announcement of the symposium has been overwhelmingly replied by more than 100 pre-registrations from 24 countries all over the world. On behalf of the organizing committee, I would like to thank you all for the enthusiastic involvements in preparation of the symposium. I truly expect that this symposium will be a most fruitful and enjoyable meeting among worldwide kiwifruit workers in beginning of the new century.

I trust that every efforts being put into preparation of the symposium will ensure the scientific program to be the best of the world class, the symposium events to be the enjoyable gathering among colleagues and friends and benefit to all delegates.

We are looking forward to your participation

! for papers

bstract submission

Please send your abstracts of 200–500 words to the Symposium Secretariat June 15, 2002.

rmat for abstract

The abstract must be as informative as possible.

t must be in English, having a maximum of 300 words, by preference Times New Roman 12 pt.

itle must be typed in **BOLD CAPITAL LETTERS**.

Author names and affiliations must be included below the title, with the presenting author underlined.

The abstract should be submitted either via e-mail or on floppy disk to the Secretariat of the Symposium (State the pertaining format).

Indicate the desired type of presentation (final decision will be made by the Scientific Committee).

- Oral
- Poster

Only abstracts of registered participants will be published in the document of the symposium.

Full paper submission

Submission of full papers is encouraged as early as possible, but not later than September 15, 2002, at registration desk. The papers should be submitted either via e-mail or on floppy disk to the Secretariat of the Symposium (State the pertaining format).

How to prepare the paper

General information

1. Manuscripts should be as concise as possible in order to a maximum the number of pages of *Acta Horticulturae*. As a rule the length of the paper should not exceed 8 pages, including figures and tables. The official language of the series *Acta Horticulturae* is English, and explains abbreviations when used for the first time and use the metric system exclusively.
2. No preference whether English or American spelling is used although uniformity within each paper is required. Latin words or phrases are in italics, with the exception of very common expressions such as "i.e.," "e.g.," "et al.," "in vitro,"

"ex vitro" and "etc." The expression "etc." for "and so forth" should be used only with series, such as 1, 2, 3, etc.

3. Use **Times New Roman** font exclusively. Titles are printed in 14 point but the rest of the manuscript, including tables should be 12 point. When italic typeface is required use italic type, not underline.

4. Scientific binomials are to be included for all plant species. Authorities need only be used when helpful for historical or taxonomic reasons. For common plants (e.g. apple, tomato, rose), common names may be used once the scientific name has been provided.

5. Papers contain one to four headings, all aligned at the left hand margin, as follows:

RANK ONE Use boldface and all capital letters. Use a space before this rank but subsequent paragraph(s) continue without a space. Subsequent paragraphs within this section are indented without spaces between paragraphs. Headings such as **INTRODUCTION, MATERIALS AND METHODS, RESULTS, DISCUSSION** are Rank one headings. Do not use a period after this heading.

Rank Two This heading subdivides **RANK ONE** headings, thus there must be at least two or more **Rank Two** subheads. Titles are **boldface** with the first letter of important words in capital letters and the others in lower case. Rank Two headings are separated by a space above the heading as in **RANK ONE** headings. No period after **Rank Two** headings. The paragraph starts on the first line after the Rank Two heading and is indented.

1. Rank Three. This heading may be used to divide Rank Two headings. Initiate this heading with Arabic numerals (1,2,3 etc.). with numbers and title in **boldface** with the beginning of each word in capital letters. The subheading ends with a period. The paragraph continues on the same line. Do not separate this heading with blank lines.

Rank Four. This heading subdividing **Rank Three** headings will be used rarely. Align left, end with a period, and continue on same line. The font is *italic*, non-boldface, with the beginning of each word in capital letters. Do not separate with blank lines.

6. Use first quality white paper for your printout. The printable area on your sheet of paper is **strictly fixed** (15.3 x 23.5 cm = 6.02 x 9.25 inches) irrespective of paper size. For A4 size paper this printable area is obtained by entering following margin settings in the "page set-up" of your word-processor: **top: 2.7 cm (1.06"); bottom: 3.5 cm (1.38"); left: 2.8 cm (1.10"); right: 2.9 cm (1.41")**

Papers should be printed preferably on laser-writers but Ink-jet printers also give

satisfactory results. *Papers produced on a type-writer will not be accepted.*

7. The final text should be single spaced but a double spaced manuscript may be submitted for editing by the convener. Titles of subheadings should **not** be underlined. Text should be "**justified**" in order to fill the entire printable area.

Provide a hanging indent (0.6 cm) on the second line of the Keywords and Literature Cited references. First lines of all paragraphs should have a 1.25 cm indentation except those that immediately follow rank three and rank four subheadings. Do not include blank lines between paragraphs within a section.

ORGANIZATION OF A RESEARCH PAPER

Title

Titles are printed in boldface in 14 point type. If the paper is in Spanish or French with extended English abstract, (see **Language** above) the title is in **boldface** in English and not in boldface for other languages. Use capital and lower case for the first word in the titles except for articles ("a" and "the"), prepositions ("of," "in" "on." "during," "between"), and conjunctions ("and" and "but"), except when they are the first word. Gene symbols, which normally begin with lower case letters are not capitalized in titles nor is the first word of specific epithets in binomials. Do not include authorities for binomials in titles. Keep titles as concise as possible. Binomials will be in boldface Italics.

Bylines

The byline under the title includes the name of author(s) (without titles) and affiliations. The given name of authors may be either written out in full or listed by initials. Initials are followed by a period. If two initials are listed, do not include a space between them but provide a space before the family name. The family name is always presented after the given name, even for those countries that use a different sequence (Spanish names are alphabetized by the paternal family name. Accents should be kept in names so as not to violate their spelling rules). The affiliation or address of author is included below the name. The address of the author may be in the language of the country, but spell out the country name in English.

For multi-authored papers keep the affiliation of each author separately; when space permits, these can be listed side by side; if not, underneath each other. If there are two authors, separate the author name by "and," e.g. A.B. Smith and C.D. Jones; three authors would be A.B. Smith, C.D Jones and E.F. Brown. Do not use footnotes in the bylines.

Footnotes should be avoided in bylines. They might be appropriate when there are two departments in one institution.

Journal Paper Numbers

Journal paper numbers, or reference numbers, if needed, are placed in the Acknowledgement section (see below).

Keywords

List five to seven key words **not** used in the title. Remember that electronic search engines focus on Title and Keywords. The second line of keywords is a hanging indent (0.6 cm).

Abstract

An abstract in English, limited to 200-300 words in a single paragraph is required in all cases. Indent the first line of the abstract. The abstract should contain a concise but comprehensive statement of the problem and results. The entire abstract should be in boldface. *The title and abstract will be freely available on the ISHS website and should be considered an advertisement for the paper as it may be all that most viewers will read. Thus, it should be carefully and accurately written.*

Introduction

This should include a statement of the problem, a brief survey of previous work, and the scope and purpose of the investigation. References to previous work should be included.

Materials and Methods (Experimental Procedures)

This section should be included in papers describing experiments but may not be required in review papers. Describe concisely the plant materials, the growing technique, methods used, and lay-out of experiments. Include the name of all chemicals and compounds. An indication of the statistical methods used to analyze data should be included

Results and Discussion

This is the heart of the paper. The section(s) may either be presented as a single section or divided into separate **Results** and **Discussion** sections. If separate, describe experimental results in the **Results** section and reserve interpretations, speculations, and conclusions for the **Discussion** section. At the end of the paper attempt to answer questions formulated in the introduction and conclude with a summary of results and an assessment of future research or prospects.

Acknowledgements

This is reserved for journal paper numbers, source of funding, and name of project, if required. Acknowledgement of help from colleagues or professional associates is

appropriate but avoid acknowledgement of routine secretarial help or family members.

Citations and Literature Cited

1. Format. Citations to references in the text are listed chronologically surrounded by parentheses with the following format: (Peters, 1950; Jones and Smith, 1990; Brown et al., 1999a). If there are two authors with the same name that have published in the same year, initials may be used to avoid confusion. Note: "et al." is used for three or more authors.

Citations to personal communications include the surname or initials of the person and are only to be included within the text, **not** in the Literature Cited section. The date is optional. Thus: (A.B. Peters, pers. commun.) or (A.B. Peters, pers. commun., 2001). Consider **Literature Cited** as a Rank 2 heading. Literature cited should only include references used in the paper. List the authors in alphabetical order, letter by letter, and in chronological order for publications of the same author(s). Do not use a comma before "and" after the penultimate author. Do not use an issue number if the journal uses consecutive numbers for each volume. In the format that follows, note that in all cases the given name or initials follow the family name.

Journal Paper:

Navazoi, J.P. and Simon, P.W. 2001. Diallel analysis of high carotenoid content in cucumber. *J. Amer. Soc. Hort. Sci.* 126:100-104.

Van Os, E. and Benoit, F. 1999. State of the art of Dutch and Belgian greenhouse horticulture and hydroponics. *Acta Hort.* 481:765-767

Book:

Darrow, G.M. 1966. *The Strawberry: History, Breeding and Physiology*. Holt, Rinehart and Winston, New York.

Chapter in Book:

Daubeny, H.A. 1996. Brambles. p.109-190. In: J. Janick and J.N. Moore (eds.), *Fruit Breeding*, Vol. 3, Nuts. Wiley, New York.

Chapter in Conference Proceedings:

Aviram, M. and Fuhrman, B. 1998. Tomato lycopene and (-carotene inhibit LDL oxidation. *Proc. Tomato and Health Seminar*. Pamplona, Spain 25-28 May. p. 45-52.

2. Abbreviations. Do not abbreviate single word journals. Do not abbreviate states or provinces of countries. When in doubt do not abbreviate. Commonly used abbreviations are as follows on the ISHS website: <http://www.ishs.org/wri/pap1.htm>

Tables and Figures

Tables and figures are normally included at the end of the article in that sequence. Prefix the table section with the word **Tables** and the figure section with the word **Figures**. Captions are provided directly above each table and below each figure with hanging indents. They are numbered consecutively with Arabic numbers, and aligned with the width of the Table or Figure, or to the full width of the page if the figure or table occupies more than half of the width of the page. Thus, Table 1, Table 2 etc. and Fig. 1, Fig. 2. etc. If the table or figure is not original, give the source at the end of the caption, e.g. Source: Jones et al. 2001.

1. Tables. Use tables sparingly. Titles of tables go above the table. Place all headings to the center of their column. The size of the table should not exceed the standard page width and length, but tables may be placed portrait or landscape format. Solid lines are used in the heading and in the bottom of the table but are to be avoided in the body, but, if necessary, use dotted lines. The units of the data must be indicated in parentheses in the table headings. If table footnotes are needed, use superscript Arabic numbers 1, 2, 3, etc. The sources of tables should be in the caption (see model).

2. Figures. Titles of figures go underneath the figure. Figures may be submitted electronically but provide a hard copy since resolution may be imperfect. If a figure is outsized it may be reduced photographically. Be sure to include clear, sharp pictures. Figures, graphs and drawings normally should be all in black and white, not color. Color photographs can only be printed after a special agreement with the conveners and ISHS Secretariat and there will be a charge to authors.

More information about how to prepare the papers for *Acta Horticulturae*, or download the sample paper in PDF format, please to the website at <http://www.ishs.org/wri/pap1.htm>

Poster Format (New)

The poster should be printed on white paper, sized 1200mm (height) × 900mm (width), or 47.2 inches (height) × 35.4 inches (width). The title is in about 100-point and the text in 28-point, use a good clear easily-read font, and leave 25 mm (1 inch) for all margins. Give names and institution of all authors include email address of presenting author.

Call for Formal Registration

Registration fee

Participants are requested to pay the total fee in U.S. Dollar, and we're sorry for unable to take credit cards for your payments due to the banking system in Wuhan city, so please send your check or money order payable to "Wuhan Institute of Botany, The CAS", and mail to the Symposium Secretariat:

Zhengwang Jiang
Wuhan Institute of Botany,
The Chinese Academy of Sciences
Moshan, Wuchang, Wuhan, 430074
Hubei, P.R. China

	Payment received by July 15, 2002	Payment received after July 15, 2002
ISHS members	400	420
Non-members	420	440
Students *	200	220
Accompanying persons	130**	150**
* Originally signed certificate needed. Only include access to scientific sessions and symposium documents.		
** Access to welcome banquet, symposium dinner, Field trip		

Registration fees for participants includes:

- Access to all scientific sessions
- One copy of symposium documents
- Welcome reception
- One copy of Acta Horticulturae
- Coffee or tea break
- Symposium banquet
- Field tour and 4 lunches

You may also remit your USD to:

Intermediary Bank: Bankers Trust Company New York, N.Y.

(Swift Code: BKTRU33)

Beneficiary Bank: Industrial & Commercial Bank of China, Hubei Provincial
Branch (Swift Code: ICBKCNBJHUB)

The Name of Beneficiary: WUHAN INSTITUTE OF BOTANY, The CAS

A/C No. of Beneficiary: 3202016409014002878 (19 digital)

Call for Hotel Reservation

The Organizing Committee has reserved a number of rooms for the conference in discount rates at the Lakeview Garden Hotel, where the Symposium will be held.

Type	Description	Rates
K1	Single room (one bed) with buffet breakfast	USD 45/day
K2	Single room (two beds) with buffet breakfast	USD 55/day
K3	Single superior with buffet breakfast	USD 60/day
K4	Double superior with buffet breakfast	USD 65/day

You can also extend your stay in the hotel (before or after the conference) with the same reduced prices. Reservation at the above prices must be confirmed with the Secretariat before July 15, 2002. After this date hotel prices change. We strongly encourage early reservation, since the availability of rooms cannot be guaranteed in case of late booking. Sharing a room with a colleague is also encouraged. If you want to share the room with a person, make sure you fill in his/her names in the form.

To reserve the hotel, just by checking the options in the registration form. You can choose either send your hotel fee (Type by days) with the registration fee or tell us what kind of room you want to reserve and pay in the hotel by credit cards or cash. But everyone who wants to stay in the hotel must pay USD100 for deposit, we'll reserve rooms for you during the symposium, the organizing committee will assist your checking-in hotel by working together with hotel staff on registration day September 15, 2002.

For those delegates wishing to stay in other hotels, the secretariat has arranged reduced rates at nearby hotels - these rates range from \$ 30 - \$ 40 per night (twin or double). You need to arrange your own transport to and from the symposium site.

To register for rooms in the Lakeview Garden Hotel, please complete the registration form and post or fax it to the Conference Secretariat, preferably before 15 July, 2002 (the deadline for early registration).

New: The Hotel is undergoing renovation from March to June, and the price for each type of room may change a little bit, and the detail will be updated after June. Sorry again for the inconvenience to you.

General Information

1. Venues

The Symposium will take place at the Lakeview Garden Hotel in Wuhan, capital city of Hubei Province, People's Republic of China. Wuhan is between Beijing and Hong Kong by railway for about 1200 km, and located in the middle of Yangtse River.

Lakeview Garden Hotel is beside the scenic East Lake, and the organizer, Wuhan Institute of Botany, The Chinese Academy of Sciences is just 8 km away.

2. Something about Wuhan

Wuhan has a typical continental climate with pleasant weather in springs and autumns. It's warm with lots of sunshine in September, and the temperature is around 22-28°C (72-82 F). Light clothing is recommended with a light overcoat for the evening or rainy weather as well. The recommended dress for the symposium sessions and social events is casual.

The electric voltage is 220 V/ 50 Hz. The hotel has the sockets on the walls or adaptors for 220/110v.

Symposium field Tour

We'll arrange one day of field tour to the production areas in Hubei Province, especially the west Hubei near Three Gorges, Yichang, where E.H. Wilson collected the first wild kiwifruit seeds. You will see not only the newly developed kiwifruit orchard,

and the rural scenery for rice production in the Jiangnan Delta Area, which is an important "Bread Basket" for China. The field tour is arranged in middle of the symposium.

Meanwhile on the first day for registration, you may choose to have a pre-tour in the city of Wuhan, which consists of three towns, and two rivers separate them. Yangtze River is the third longest one in the world, and it takes an important role for cargo transportation even for today. You'll visit the municipal park (Zhongshan Park) in the down town area, and the scenic area (Moshan Mountain) around the institute.

Optional tour (post-symposium tour)

Wuhan is in the center to the east in China, and its transportation to other part of China is very convenient, either by airplane, Long-distance bus (greyhound), or train.

After the symposium, you may choose to visit the Three Georges and Junior Georges for three days, at the rates USD150/person by good accommodation.

Language

English will be the official language. Simultaneous translation into Chinese will be provided for some occasions, particularly during opening and closing ceremonies. If enough interest is raised among those responding to this announcement, Chinese may be considered as co-official, allowing oral presentations to be given in Chinese with simultaneous translation to English.

Website for the symposium

You can see the second announcement on the website by click:

中国科学院武汉植物研究所

Wuhan Institute of Botany, the Chinese Academy of Sciences

June 25, 2002

Dear MATIAS KULCZEWSKI:

Your paper "Effect of shoot size and fruit position on fruit size on Hayward fruit" has been accepted for the oral presentation, and you are cordially invited to participate in the 5th International Symposium on Kiwifruit, to be held in the Lakeview Garden Hotel, Wuhan city, Hubei province, P.R. China, September 15-20, 2002. The symposium is organized by Wuhan Institute of Botany and sponsored by the Chinese Academy of Sciences, under auspices of the International Society for Horticultural Sciences.

The symposium will continue to review recent advances in kiwifruit research, extension and production in past four years after the last symposium in Chile. It provides an opportunity for the presentations of all aspects of genetics/breeding, germplasm/taxonomy & systematics, molecular biology/biochemistry, propagation/tissue culture & biotechnology, production/economics & marketing, orchard management, post harvest/physiology, etc. The first announcement of the symposium has been overwhelmingly replied by more than 100 pre-registrations from 24 countries all over the world. On behalf of the organizing committee, I would like to thank you all for the enthusiastic involvements in preparation of the symposium. I truly expect that this symposium will be a most fruitful and enjoyable meeting among worldwide kiwifruit workers in beginning of the new century.

I trust that every efforts being put into preparation of the symposium will ensure the scientific program to be the best of the world class, the symposium events to be the enjoyable gathering among colleagues and friends and benefit to all delegates.

We are looking forward to your participation

Hongwen Huang

Symposium Convener

EFFECT OF SHOOT SIZE AND FRUIT POSITION ON FRUIT SIZE OF HAYWARD KIWIFRUIT (*Actinidia deliciosa*)

Kulczewski B. Ingeniero Agrónomo, Asesorías K&R Ltda..

Presentation: Oral.

Due to the importance of fruit size on qualification of Hayward kiwifruit, it was studied if length and diameter of the fruiting shoots, and fruit position along the shoots had an effect on fruit size in four commercial orchards.

The study was developed in well pollinated blocks between March and April of 1991, at an orchard of the Metropolitan Region and three orchards of the 7th Region of Chile.

For these purposes at least 200 shoots with three fruit and also with four fruit were selected in the orchards, including all these types of shoots in each plant. Then each fruiting shoot was divided in categories Big, Medium or Small based on its length and basal diameter and its fruit was harvested at 6.2 – 6.5°Brix and weighed. The only thinning that each orchard had received included fasciated, double and triple flower buds pre bloom.

The results were statistically analysed and showed that Big and Medium size shoots produced bigger fruit than Small shoots and that fruit size decreased gradually as fruit position moved away from the base of the shoot. The average fruit size of 3 fruit shoots was higher than 4 fruit shoots and the decrease of size along the shoots was more pronounced in four than in three fruit shoots.

HOTEL LAKE VIEW GARDEN

No hay tarifa publicada de este hotel.

En todo caso como referencia le doy el Hotel Oriental , Single USD 154.- sin desayuno.

Si Ud. tiene una tarifa de USD 45 como me informo, es lo más conveniente, pagado en Chile no vamos a encontrar nada a ese valor.

VISA CHINA

- Pasaporte al día (vigencia minima 6 meses antes de expirar)
- 1Foto
- Formulario
- Invitación Simposio

VALOR VISA \$ 30.000.-

TRAMITACION 9.786.-

Sin otro particular y quedando atenta a sus consultas, le saluda,

Maria Piera Merani
COCHA ANTILEN
